

Integration of Best HMI & The Most Powerful PLC

High-End SCADA HMI with Built-In Plug-in I/O

1 Single piece housing with protective cover

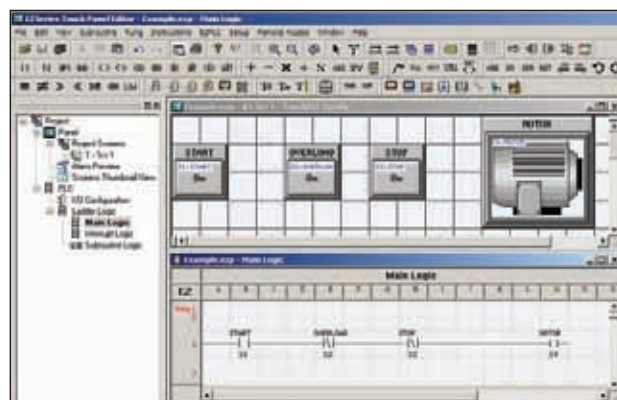

Tough TouchPLC comes in a single piece housing that includes a hinged translucent cover for protection of electronic circuits inside the TouchPLC. All the LED indicators showing the status of the PLC as well as the status of Input and output modules are visible thru the translucent cover. The hinged cover is designed to close with a snap-in latch.

Single port programming with common database

2 Program Touchpanel and PLC through one port, one programming software & common database

The Tough TouchPLC can be programmed thru the 9-pin RS232 port on the Touchpanel itself. The programming software is also integrated into one package that allows use of the same database for Touchpanel and PLC functionalities. In addition both the Touchpanel objects and corresponding PLC tags and ladder symbols can appear on the same design screen.
