

## Winner of Best HMI Award 2008

**"OSCAR"**  
of Automation

AVG's Human Machine Interface Products also known as Touchpanels, have been widely recognized in the industry. Well over 25000 automation control engineers all over the world have used AVG's Touchpanels and PLCs without any formal training. Their ease of programming is legendary. In addition, their High-end features such as Remote Monitoring and Control, have won AVG the most coveted Engineers' Choice Award in 2008. Most trade magazine surveys conducted in North America since early 2005, conclude by an overwhelming majority that the AVG Touchpanels provide the Best value in the market place.

## Wide Selection of Products for Every Application

AVG Uticor has a wide selection of products for every application, from a small 4" Touchpanel and a 24 I/O PLC to 21" HMI and 2048 I/O PLC. 26 different types of plug-in I/O modules are offered that include Digital, Analog, Thermocouple, RTD, PWM, Storage, High Speed Counter modules. LED Marquees that connect directly to PLCs are offered in a 1 Line 10 Character configuration to an 8 Line 80 Character configuration. Standard Uticor products operate from -20°C to 60°C, Uticor Lite products operate from 0 to 50°C and special products are available that can operate from -40°C to 70°C.
