Toughpanel with Windows CE Processor

Tough
Panel

RS232 and RS 422/485 Ports

Com1 is RS232 which can be used for both PLC communication or programming the panel from a PC.
Com 2 is RS422/485 is an auxiliary port that can be used for PLC communication or connection to another device like a barcode printer

Ethernet Port

Ethernet port can be used simultaneously for **communicating to PLC, programming the panel, UTDaq** and for NetView and Control.

All Toughpanels have Conformal Coating as a Standard
AVG, Uticor and Autotech, produce a number of products such as Autotech's legendary Digisolver which has Epoxy potting. All Toughpanels have a conformal coat on its Printed Circuit Boards which increases the life of the product by protecting inner circuits and components from moisture, salt spray, aggressive chemicals and vapors. Conformal coating **also protects the Toughpanel from airborne particles and dust which make Toughpanels ideal for rough environments such as found in the tire, mining and metal industries.**

NetView and Control (NVC) option Card for Toughpanels with Dedicated Processor

Available on any Toughpanel with dedicated processor and having 512K or more RAM and Flash memory
